

Precision from prototype to small series

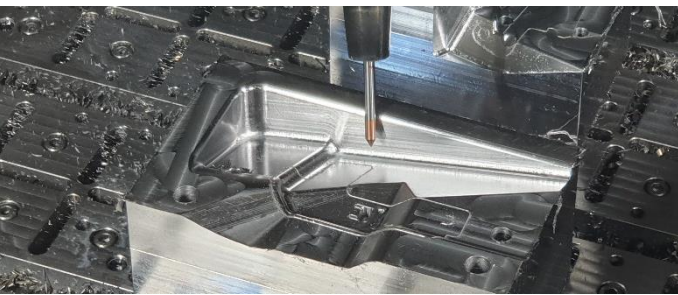

Large production depth – best quality

State-of-art production and measurement technology

Motivated employees – satisfied customers

Founded in 1989, MX Prototyping is a medium-sized company in prototyping and combines craft and industry. Highest quality and customer satisfaction are our motivation.

Humans and technology – a perfect team

The effectiveness of our quality and environmental management system is confirmed by the certifications to ISO 9001: 2015 and ISO 14001: 2015.

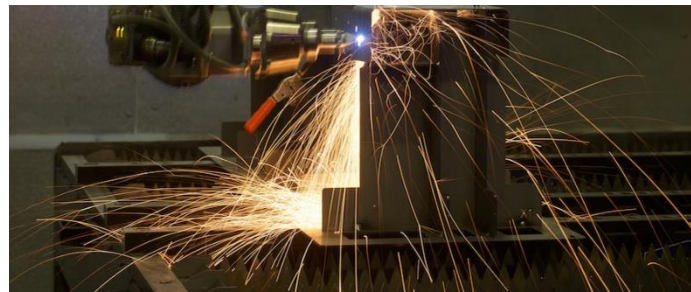

From prototype to small series

MX Prototyping produces prototype and small series sheet metal parts, forming tools, laser boards and laser edge parts, mainly in the automotive and mechanical engineering sectors.

Precision work on behalf of customers

- forming of steel, aluminum or magnesium components
- prototypes in steel, aluminum or magnesium
- small series parts made of steel or aluminum
- production of complex assemblies
- forming of high-strength steels

Our Range

- Design and forming simulation
- Toolroom
- Metal forming
- 3D laser technology
- 3D measurement
- Welding technology
- Production of cockpit carriers
- Testing
